Hi my friend. Can you write an endorsement for Oaks In Office? It will be used by church laymen attempting to disciple up and coming Civic Leaders. It would mean much to have you say how important that is. I will attach an overview below....

Missing you at study. We had two new Cabinet Members come last week.

Blessings, ralph

Freddy — thank you for the reply, and while disappointed it won't work this time, I look forward to hopefully connecting soon when schedules permit. To that end, with your blessing I will forward your contact info to members of my team to work some magic with you in hopes of getting together in the near term.

Godspeed in all your and the President's endeavors!

Subject: Greetings

Freddy —

Greetings to you as we begin the New Year — we have not had the opportunity to meet, but your name and contact was given to me by Dana Perino. I shared with Dana that I was going to be in Dallas next Monday afternoon, and understanding the short notice, asked her how best to possibly coordinate a time to visit with President Bush. There is no agenda other than fellowship and connection. The President and I share a background in baseball with the Rangers . . . I owned the Triple A affiliate (OKC) of his Texas Rangers. I also worked with Jeb during his campaign. I understand the brevity of time to perhaps coordinate, and please accept my apologies for the short notice, but my schedule was altered this week and the change triggered a hope that we could spend some time together. This is my personal email. Please feel free to respond to me directly. Thank you for your assistance.

Scott Pruitt

Subject: Reaching out from Newsweek

Hello Mr. Thrutchley,

I hope this email finds you well. I'm with Newsweek and I'm assisting my colleague Alex Nazaryan (cc'ed here) with an article he's writing about Scott Pruitt before he was the Administrator of the Environmental Protection Agency.

I see on LinkedIn that you worked under Pruitt as an Assistant Attorney General, among other positions. We're looking to do the most in-depth profile of Pruitt possible and would love any information you can provide. If you'd like to speak anonymously or give us background without us attributing it to you, we're fine with that as well.

Please let us know if you can hop on the phone with Alex and provide any insight for this article. I look forward to hearing from you.

Thanks for your time,
Zola Ray | Editorial Assistant

Dates are Friday, July 14 - Saturday, July 22.

Fly in and out of Tel Aviv but will also travel over to Jerusalem the 16 - 18.

They have a rough agenda which we will definitely add to but right now, they just are waiting to hear if the dates work for you all.

Also, if there are any hotels we can be looking into in both cities, please let me know.

Thank you!

Subject: this is a work in progress, but

This allows an impactful first day meeting senior staff, delivering substantive remarks broadcast agency wide (because we need at least part of them to be successful), jumping in your first day to reinstate the weekly RA and AA meetings, and wrapping up your administrative tasks. Then it immediately puts you on the campaign trail for mayor throughout the Agency sitting down with all the program offices.

I've attached notes throughout because this is only draft, but I just wanted to reassure you this can be a really meaningful first week accomplishing both calming and engaging the Agency. It's the first initial steps, and I have no doubt you will pull it off with the same style you did you nomination hearing. It will leave an excellent impression and then we'll keep going.

For tomorrow morning.

I will have a notebook for you with attachments should you want to review those, but this four pager is what I believe the very pressing issues are for the first day. We will get into further administrative delegations tomorrow.

Additionally, attached is an updated first day schedule.

EPA Administrator – 1st Day Schedule (Draft)

DAY 1 at EPA Tuesday, February 21, 2017			
Time	Event	Location	Comments
7:30	Arrival	Auto entrance	
7:30-8:30	Senior Staff Meeting	Office	Discuss EO implementation & directives, budget, issues facing decision in first 30 days, and court ordered deadlines – Jackson, Dravis, Schnare.
8:30-9:00	Official Photo	Office	Take Official Photo – Media Studio – WJC-N 6330
9:00-9:20	Meet and Greet I	Office	Catherine McCabe and Don Benton. After brief chat Catherine departs to return later with senior selected career staff. This is for introductions.
9:20-9:40	Meet and Greet II	Office	Beachhead team arrives– This is for introductions only to those who have begun to implement the President's Agenda.
9:40-10:00	Meet and Greet III	Office	Acting AA's and Associate Administrators and Senior Career Leaders – Also simply for introductions.

11:00-11:10	Movement Time	EPA Complex	Back to Office
11:10-12:00	Preparation for remarks	Office	Preparation for Agency remarks
12:00-1:00	Welcome Remarks / Speech / Reception	Green Room	Live audience members and EPA leadership, Stream to all EPA employees; select press present
1:00-2:00	Lunch	TBD	Need plan for lunch
	Time also built in for brief media following remarks	Office	Konkus working out details.
2:00-3:00	AA & RA Meet and Greet	Alm Room	Acting Office Directors and Regional Administrators – introduction, overview focused high level, in line states covered, etc. (3 mins each - max) OCIR Coordinate
3:00-4:00	Ethics Briefings / Requirements	Office	Justina Fugh and Kevin Minoli, this is a required ethics briefing
4:00-4:45	Administrative Tasks	Office	In processing paperwork, Health Care Elections, Office Phone, Voicemail, Computer, iPhone, iPad setup, Keys.
4:45-5:30	Immediate Office Operations and Scheduling Procedures	Office	OEX process, discussion on immediate office support operations, scheduling procedures and advance planning – Reeder, Flynn, Schnare, Dravis, Hale, Jackson, Weiss.
UTC	Administrators Time	Office	Until completion (UTC) or departure for the day. Review take home reading package

Priority Issues List – 2/21/17

Executive Orders – There will likely be three orders issued on Energy Independence, WOTUS, and CAFÉ standards. The timing remains unclear.

Energy Independence (draft attached):

- Submit preliminary plan in 60 days and final plan in 150 days
- Review of identified rules in the EO and any other agency actions affecting energy development. The later can include the Information Collection Request (ICR) EPA issued in November on the oil and gas industry.
- Depending on the situation, we can grant extensions, grant petitions, and issue very short 1-2 page NPRM announcing reconsideration and taking comment.

WOTUS (draft attached):

- Review WOTUS rule with Corps
- EPA needs to publish a Notice of Reconsideration and directive requiring use of the Scalia formulation as given in *Rapanos* until EPA completes reconsideration.

CAFÉ (unofficial draft attached):

- Reopening mid-term review and allowing industry the opportunity to comment much further.
- We need a briefing on how EPA has been working with DOT.
- Reconsideration of the California Waiver may be a part of this EO although it is not in this draft version.

Agency Operations and Budget Submission Information --

Agency Budget

- **Upcoming deadlines and planning. Subject of COS meeting this morning at OEOB.**
- FY 2017 - Current Continuing Resolution expires April 28. Agency has 30 calendar days after enactment of appropriations bill to develop a FY 2017 Operating Plan to submit to Congressional appropriators.
- FY 2018 - Awaiting funding levels and policy guidance from OMB. FY 2018 Congressional hearings follow transmittal to Congress. Expectation is the EPA is required to cut \$100 million.
- FY 2019 – Anticipate OMB guidance to begin planning after FY 2018 budget is submitted to Congress.

Strategic Plan

- Strategic Plan due to OMB June 2nd
- Administrator's priority goal statements, strategic objectives, and two-year agency priority goal areas needed by March 1 so plan development can begin.

Time Sensitive Rulemaking Issues –

Financial Requirements for Hard Rock Mining

On December 1, EPA issued a proposed rule that would require owners or operators of certain facilities within the hardrock mining industry to demonstrate financial responsibility to cover CERCLA liabilities at their sites. There is a court ordered deadline to take final action on the proposed rule by December 1, 2017. The public comment period is open until March 13, 2017, and the mining community has requested to extend the comment period an additional 120-days. We have received two letters, one signed by House Committee leadership (T&I, E&C, and Resources) and one signed by 11 Senators requesting a 120-day extension. That will significantly reduce the time EPA has to get the rule into final form. However, proponents argue that EPA should revisit the court deadlines.

RECOMMENDATION: 90 day extension for comment period with opportunity to extend.

Generally, we will likely start to receive a number of comment extension requests. Until we have further briefings on other upcoming rule makings and with the start of the new Administration, I would recommend our predisposition is to liberally grant extensions.

Chlorpyrifos pesticide

EPA is under a court-ordered deadline to issue a final tolerance rule for Chlorpyrifos by March 31, 2017; it is one of the most widely used insecticides for food crops. According to industry, EPA is moving in the direction of rejecting all tolerances meaning it cannot be used. Chlorpyrifos periodic 15 year review will come before the agency soon – possibly within the next year. The court has already extended the time period for EPA to consider the petition and regardless of a new Administration may deny a request for additional time.

RECOMMENDATION: Consider denying the petition – The court has told EPA to take action but may not have directed what action had to be taken. Denying the petition is a legal and viable option – although bold. However, if denial is the action chosen EPA will need to make clear that the issues in the petition will be addressed in the upcoming registration review of chlorpyrifos, which is more transparent, and the Administrator could expedite the review.

Reid Vapor Pressure letter from Grassley, Ernst, Roberts, Blunt, and Thune

On Friday, these Senators sent you a letter asking for EPA to grant a “1-psi” waiver under the CAA to allow the sale of E15 between June 1 and Sept 15. The letter cites as an example a waiver EPA granted in 1989 later codified in the 1990 CAA Amendments.

RECOMMENDATION: EPA staff needs to review definitely whether a waiver can be granted or whether Congressional action is required to allow a waiver resulting in the sale of E15 year-round.

TSCA Implementation upcoming deadlines

The recent TSCA amendments have imposed several requirements on EPA. By **April 1, 2017**, EPA must publish an inventory of mercury supply, use, and trade in the U.S. By **mid-June 2017**, EPA must finalize three rules – the “prioritization rule,” the “risk evaluation rule,” and the “inventory reset” rule as well as publish the scope of the evaluation of the first 10 chemicals (already identified as the first 10 to undergo risk evaluations)

RECOMMENDATION: EPA staff needs to provide briefing on status of these rules and a briefing on implementation of new chemical review which is requiring more time than the usual 90-day review before approval to enter commerce.

Site Specific Updates –

Flint, Michigan (Lead in Drinking Water)

- After Flint’s April 2014 switch from purchasing drinking water from Detroit to treating raw water from the Flint River, the highly corrosive water corroded the pipes and caused lead levels to spike.
- After the State declared an emergency followed by a Presidential emergency declaration, EPA issued a SDWA emergency order to take immediate action to address concerns with the safety of the drinking water system. EPA amended the Order in November, 2016, to provide clear milestones and oversight requirements.
- While lead levels have significantly declined after a sustained federal effort, Flint has notified EPA of its intent to switch to another water source.
- Flint is set to receive an additional \$100M in federal drinking water funding pursuant to legislation signed in December 2016. This funding will be critical to, among other things, supplement the current funds dedicated to removal of lead service lines.
- **SIGNIFICANCE:** Flint continues to receive significant press attention surrounding the question of whether bottled water and/or filters are needed at this juncture. EPA is also poised to publicly release a review of the Michigan Drinking Water Program, which has been shared with the state. Daily briefings on this situation will be necessary for the foreseeable future.

Gold King Mine (Bonita Peak Mining District)

- On August 5, 2015, EPA employees and contractors were investigating the Gold King Mine (GKM) near Silverton, Colorado and approximately three million gallons of acid mine water were released into nearby Cement Creek.
- The plume eventually travelled to the Animas River and San Juan River, impacting downstream communities in Utah, Colorado, New Mexico, and Tribal nations.
- To date, EPA has reimbursed state, local and tribal CERCLA response costs of over \$1.6 million.
- Multiple lawsuits are pending in the U.S. District Court and include CERCLA and CWA claims against EPA as well as CERCLA, RCRA and tort claims against co-defendants. Claims are for multiple billions of dollars.

- DOJ filed a Motion to Dismiss the complaints of New Mexico and Navajo Nation on February 13, 2017.
- On November 28, 2016, the Supreme Court invited the Solicitor General to submit views on the case of New Mexico v. Colorado. No brief has been filed yet with the Court.
- **SIGNIFICANCE:**
 - At Colorado's request, EPA initiated efforts to list the Bonita Peak Mining District, which includes 35 mines and seven tunnels, on the National Priority List.
 - EPA continues to evaluate reimbursement of costs
 - Section 5004 of the WIIN Act enacted in December 2016 authored by Senators Gardner (R-CO) and Udall (D-NM) included a sense of the Congress that the Administrator should process claims under the Federal Tort Claims Act for injuries from the release AND increased the time for eligible response cost claims from city, state, and tribal claims through 9-16-16, and sets deadlines:
 - The Administrator shall decide on paying claims submitted before enactment within 90 days (March 16, 2017)
 - The Administrator shall decide on paying claims submitted after enactment within 90 days of receiving the claim.
 - All claims shall be submitted to the Administrator within 180 days of enactment (June 16, 2017)
 - When decisions are made, the EPA shall notify the claimant within 30 days.

Subject: RE: Art -Loan Department

Good morning SeVera,

At long last I have some works for the Administrator to consider. Unfortunately I did not have anything related to the Founding Fathers but I did include one portrait of Lincoln if that might be of interest.

Please note that the Administrator may borrower up to five works of art for his immediate office area. After selections are made I will need to have curatorial and conservation approval as well as that of our director, deputy director, and president. In addition, all works must be glazed for loan. While we do expedite these requests as much as we can, I just wanted to make you aware that the whole process takes a bit of time. Also attached are our general procedures for these extended loans.

Please let me know if you have any questions or additional requests and I look forward to hearing back from you if any of the works are of interest for loan.

Best wishes,

Lisa

NATIONAL GALLERY OF ART

Department of Loans and the National Lending Service

Extended Loan Program

Point of contact: Lisa M. MacDougall, Senior Loan Officer
National Gallery of Art
6th Street and Constitution Avenue NW
Washington, D.C. 20565

Telephone (office): 202.842.6822
Telephone (mobile): 202.427.3119
Fax: 202.789.3246
Email: l-macdougall@nga.gov

Mailing Address: National Gallery of Art
2000B South Club Drive
Landover, Maryland 20785

Schedule: The Department of Loans at the National Gallery will contact the borrower each fall to inquire about renewing the works on loan . Once the Department of Loans has received the signed confirmation letter of the borrower's wish to renew a conservator will contact the responsible office to arrange a time to inspect the works (this timeframe can vary depending on when renewal paperwork is signed and received from the borrower).
To arrange shipment and installation of works or if works need to be moved for any reason (i.e. renovations or major work projects in the vicinity of the artwork) the borrower must contact Holly Garner in our registrar's office at 202.842.6237 or via email h-garner@nga.gov.

Policy and Procedure: (the policies below are sent with the loan approval letter)

1) The Board of Trustees of the National Gallery of Art may, in its discretion, extend loans from its collections to certain senior United States Government officials (the President, Vice President, Cabinet Members, and Justices of the Supreme Court) for the decoration of their offices in Federal Buildings.

Once the NGA is notified of the final selection of artwork, every effort is made to have the loan officially approved and the works prepared for shipment within six to eight weeks (the delivery and installation of artwork is also subject to the transit schedule of the Gallery's Registrar's office.

(202) 842-6822 telephone • (202) 789-3246 fax
Sixth Street and Constitution Avenue NW, Washington, DC • www.nga.gov
Mailing address • 2000B South Club Drive, Landover, MD 20785

- 2) Such loans are granted for one year at a time and may be renewed. In the event a loan has been in effect for less than six months at the end of the initial calendar year, the first renewal will fall due at the end of the following calendar year.
- 3) In the late fall, the NGA will inquire in writing if the borrower wishes to retain the loans through the following year. Prior to each renewal, all loans must be inspected for their condition and approved for renewal by the Gallery's conservators who will make appointments for such inspections.
- 4) Borrowers will be advised in writing when renewals of loans have been approved, usually in late January/early February.
- 5) Loans are granted without cost to borrowers.
- 6) The National Gallery of Art reserves the right to withdraw any loan. This shall include the right to make temporary withdrawals for special exhibitions, conservation treatment, photographic needs, or other purposes.
- 7) Loans are not transferable and shall be automatically withdrawn upon the expiration of tenure of the official to whom they were granted.
- 8) Loans will be delivered by the Gallery's art handlers who will hang paintings and mount sculptures, etc. **Loans may not be hung, moved, unframed, cleaned, or handled in any manner by other persons under any circumstances. The Gallery's staff will be pleased to relocate any loan upon request of the official to whom it was granted. (contact Holly Garner at 202.842.6237)**

Display Requirements:

1. All paintings must be framed and glazed for loan.
2. NGA will attach hanging devices to frames and must be contacted if additional hardware is required.
3. Works should not be installed in heavy traffic areas where art objects are at risk of being touched or brushed.
4. No picture lights may be installed on NGA frame or on the wall over or near NGA paintings.

5. Flowers, decorative items, furniture, fax and/or copy machines should not be placed in close proximity to the paintings.

Light levels:

1. Natural, quartz, tungsten-halogen, and fluorescent light will be filtered for ultraviolet radiation.
2. Works of art on paper will be stored and exhibited only in incandescent light or other light that has been filtered to remove at least 97% of the ultraviolet radiation.
3. Light levels will be measured with a calibrated footcandle/lux meter and must not exceed the following levels:

<i>Paintings and Sculptures:</i>	35 footcandles (377 lux)

Hi SeVera,

Our conservator had a chance to look at the paintings and we have two that are available- see the attached list. If Mr. Pruitt is interested in borrowing either painting, please let me know and we can schedule a site visit to check the environment and security. Does Mr. Pruitt's office have 24/7 security?

Let me know if you want to proceed with a loan.

Hi SeVera,

I have been looking through our collection data base and we do not have many to choose from since most of them are already on the walls here at the gallery. We do not have a Hamilton, Madison or Theodore Roosevelt available to lend.

I found three paintings that are a possibility – James Monroe, John Adams, John Marshall – but the conservator has to examine them first because they have been in storage. That will probably take a week or two. If Mr. Pruitt is **not** interested in any of these paintings, let me know.

Dear Ms. Wilson:

Thank you for the follow-up information about Mr. Pruitt's interest in paintings for his office suite at the EPA. We will see if there are any portraits available in storage for the individuals you have listed below, though as you can image, they are our top individual for being on view.

The National Portrait Gallery loan policy for high ranking government officials stipulates that portraits could be lent for installation in the administrator's personal office or immediate

reception area only and that the facility must meet minimum museum requirements for stable environmental conditions (temperature, humidity and light levels) as well as the security status (24/7 physical on-site and/or electronic surveillance), etc. Let us first determine if we have any portraits available, then we can go from there to obtain facility information. I've copied Beth Isaacson, Exhibitions Assistant in my department, as she will research potential loans and if we have anything available in storage, she'll provide a list of those options for Mr. Pruitt's review and pursue the facility information at that time.

On a related item, the National Portrait Gallery (NPG) does not collection landscape paintings. I believe you mentioned that you have been referred to me by Jenni Lee at the Smithsonian American Art Museum (SAAM). I'm copying her on that request in case SAAM might have any American landscape paintings available for loan to Mr. Pruitt's office.

Thank you for your interest in the Smithsonian collections. All best.

Subject: DOE pushing small modular coal plant development

Scott, I hope all is well with you in DC. I miss our fellowship in OK, but I am deeply grateful for your sacrificial service at the EPA. You are seldom out of my mind as you are frequently in my thoughts and prayers.

One of my colleagues recently sent me the article below about the DOE interest in small, modular, efficient coal energy plants. When I read that, it was immediately clear that one of my post-retirement projects, a patented technology for a clean coal project, fits this profile almost to a "T". Let me give you a brief background and then see where we go from here.

One of my great friends and member of the Oklahoma Christian University Board of Trustees was a man named Mark Wiley, a brilliant mining engineer from Colorado, who invented a patented process for coal gasification that produces energy in numerous formats in a clean (minimal CO2 discharge which is easily captured and put to useful purposes) and efficient manner. Before he died unexpectedly last October, Mark and I, and another OC Trustee Jeff Dimick, began working toward the implementation of his invention for the benefit of Christian higher education. Mark donated a \$4 million technology license to one of our sister Christian universities, that has now transferred it to a new non-profit enterprise, ACE Educational Foundation, Inc., to implement the technology. Jeff is a longtime high-level project engineer for the Boeing Company who has now retired to spend full time on this project.

It is our belief that this technology can transform the coal industry (and thus the energy industry), and it has understandably caused considerable excitement in West Virginia, where our 60 acre site is located. I am not the technical expert on this project, but would be glad to provide you with considerable additional project detail as needed. In essence, it will turn coal into electricity, diesel fuel, jet fuel, urea fertilizer, or numerous other energy applications depending on the desired product and do so with minimal environmental consequences, and at economic cost. The technology has been tested and evaluated by Fluor and others, but has not yet been developed into a commercial operation—and that is what we are seeking to do as early as possible.

Would you and appropriate colleagues at EPA be able to give Jeff and me an audience in the very near future to demonstrate for you what we have and how it fits in the national strategic interest. If possible, it would also be great to present to Rick Perry. While in DC, we will also connect with the legislative delegation from WV and from OK. With your and Secretary Perry's

support, we believe we are poised to get this job-saving and clean-energy producing technology into production in a 24 month time-frame (12-18 months for a smaller, but economically-viable demonstration plant).

Please let me hear from you at your earliest opportunity with a couple of dates that we can meet you in DC (or elsewhere if you prefer). We will do our best to clear our calendars to meet at your convenience. I believe an hour (½ of PPT presentation and ½ hour of Q&A and next steps) will be adequate.

Thank you and blessings,

Mike E. O'Neal, JD, CPA

DOE pushing small modular coal plant development

By **Gavin Bade @GavinBade**

March 7, 2018 <https://www.utilitydive.com/news/doe-pushing-small-modular-coal-plant-development/518668/>

Dive Brief:

- The Department of Energy wants the private sector to help it develop small modular coal-fired power plants, a senior DOE official told reporters at a Houston energy conference this week.
- The comments reinforce a goal in [DOE's budget justification document](#) that would see the agency develop at least two designs of small or modular coal plants — without carbon capture — by 2022. The budget requests \$175 million to meet that goal and develop new, higher efficiency coal generators.
- The budget proposal reflects a shift in focus at DOE from carbon capture and storage (CCS) to the development of higher efficiency coal plants without carbon control technologies. Despite the shift, U.S. utilities overwhelmingly say they are not likely to develop new coal generators.

Dive Insight:

Typically in the power sector, the words "small" and "modular" are applied to nuclear reactor technologies.

The subject of a separate DOE funding initiative, the nuclear industry and senior agency officials hope these small modular reactors (SMRs) will revolutionize the sector by allowing a flexible, zero-carbon generation source that operates around the clock.

But DOE officials are also pushing the development of small modular coal plants, a senior official told media this week at the CERAWEEK conference in Houston. The agency will set up competitive funding opportunities with cost share requirements, Steve Winberg, assistant secretary for fossil energy, told Axios, and DOE plans to issue a request for proposals on new plant designs.

Winberg told the Houston Chronicle that while DOE's budget proposal would cut carbon capture research by 80%, CCS work would not halt at the agency. Small plants will be better suited for carbon capture upgrades, he said.

The comments reflect new priorities in the Department of Energy's budget proposal, which requests a 50% increase in funding for high efficiency coal plants and small, modular designs.

By the end of fiscal year 2022, DOE wants this funding to result in at least three technologies that "improve the average heat rate (i.e., efficiency) of a typical plant in the existing fleet by 5% from the 2017 baseline of 30%."

Additionally, DOE would target the development of "at least two designs of advanced high efficiency (greater than or equal to 42% on a higher heating value basis), low emission (HELE) coal fired, small-scale and/or modular units that have flexible operating capacity to meet baseload and load following requirements needed for the evolving grid."

The new emphasis on small coal plants without carbon capture reflects a broader shift in what the DOE and the Trump administration consider "clean coal." While the term has traditionally referred to plants with CCS installed, many senior administration officials use it for plants without the technology.

During a visit to a high efficiency coal plant this summer, Energy Secretary Rick Perry reportedly indicated that when the administration uses the term "clean coal," it also refers to the more efficient combustion technologies. EPA Administrator Scott Pruitt was also scheduled to travel to a Japanese ultra-supercritical plant in January before a government shutdown derailed his plans.

Enhancing coal plant efficiency is also likely to form the foundation of Pruitt's replacement for the Clean Power Plan, an Obama-era pollution regulation. Instead of pushing coal plant owners to invest in lower-emitting fuel sources, the replacement rule is likely to only require modest efficiency upgrades at existing plants.

The new administration paradigm for "clean coal" aligns with calls from some influential coal industry figures to shift away from CCS. In a memo delivered to the White House last year coal magnate Bob Murray called CCS a "pseudonym for no coal" and urged an elimination of funding. A number of Trump administration actions on energy have aligned with the memo, including the DOE's proposal to lend cost recovery to coal and nuclear plants.

Regardless of the DOE's new focus, utilities in the U.S. say they are unlikely to add new coal generation of any size. Utility Dive's recent survey of nearly 700 electric utility professionals, conducted in Dec. 2017, revealed that the vast majority of utilities expect coal to decrease significantly as a part of their fuel mix, and virtually no one expects to add coal-fired capacity.

COAL

	Decrease significantly	Decrease moderately	Stay about the same	Increase moderately	Increase significantly	Total
New England	77.78%	16.67%	5.56%	0.00%	0.00%	6.16%
Mid-Atlantic	59.26%	29.63%	11.11%	0.00%	0.00%	9.25%
South & Southeast	41.30%	50.00%	6.52%	2.17%	0.00%	15.75%
Midwest	52.31%	38.46%	9.23%	0.00%	0.00%	22.26%
Great Plains & Rocky Mountains	66.67%	27.78%	5.56%	0.00%	0.00%	6.16%
Southwest and South Central	68.18%	18.18%	13.64%	0.00%	0.00%	7.53%
West Coast	66.67%	6.67%	25.00%	0.00%	1.67%	20.55%
Canada	75.00%	4.17%	20.83%	0.00%	0.00%	8.22%
Total	57.53%	25.00%	12.67%	0.34%	0.34%	100.00%

No North American utilities have plans to build a new coal plant, so any expectation of increased coal-fired generation in a utility's fuel mix likely comes from higher utilization of existing plants.

Scott, I am looking forward to fellowship with you on Tuesday at 11:30 and seeking your counsel regarding our project. Couple of logistics:

- Coming with me will be my colleagues in this project:
 - Jeff Dimick - OC Alumnus and former Trustee, retired Boeing project manager/engineer, President/Trustee of ACE Educational Foundation
 - Dr. Dan Blair - Business Dean, Ohio Valley University, and VP/Trustee of ACE Educational Foundation
 - Darlene Sherrod - VP Technology, TCG Global, LLC, Denver, and chief engineer on our project
- Where do you suggest we meet?

Thanks and blessings,

Scott, I have been thinking about you a lot recently and so glad you are standing strong against all the politically-motivated efforts to discredit you. You are doing great and vital work for the future of our country and our children.

We very much appreciate Hayley's help in connecting us with DOE. Due to conflicts with the prior dates, we have rescheduled our meeting with DOE Asst. Secretary Steven Winberg to Monday, April 30, at 10:30 a.m. at the Forrestal Building. We would love to have you join us if

that happens to fit your schedule, but if not, it would be great to meet with you another time. I will be in DC Sunday evening, all day Monday, and Tuesday until 2:25 p.m. and would be honored to host you for a meal or to meet you at your office at a convenient time. Let me know if there is a convenient time to break bread, meet, or join us at DOE.

I deeply appreciate the calm and truth-centered way you represent us in DC. You are in my prayers.

6/25/18, Harold Hamm to Scott Pruitt regarding scheduling:

Connie Nicholas can arrange a forum with the North Dakota Corn Growers whose national office is in Fargo if you want to speak to them.
Just let us know.

SP:

May we visit for a moment about ND?

HH:

Ok

6/27/18, Harold Hamm's assistant to Scott Pruitt:

My name is Lynne and I am Harold Hamm's assistant at Continental Resources. Mr. Hamm asked me to let you know that Bob Tyrell from the American Spectator is trying to reach you to set up a dinner. Mr. Hamm said that he gave you one of Mr. Tyrell's articles earlier this week. I believe Mr. Tyrell was planning to call the main EPA phone number but Harold asked me to text you Mr. Tyrell's number **Ex. 6** should you want to reach out directly. Thank you.

SP:

Thank you Lynne for the message.

Lynne:

You are most welcome.

6/28/18, Scott Pruitt to Hayley Ford regarding scheduling:

Bob Ross of OKC, of the Ross Foundation, wants me to speak to a YPO gathering. Caught me in LAX. Pls connect and collect some info for scheduling assessment. Thank you.

Hayley Ford:

Will do thanks!

6/26/18, Hayley Ford to Scott Pruitt regarding schedule:

Calls we scheduled this morning:

9-9:20CTâ€"Call Susanâ€™s cell at **Ex. 6** Patrick mentioned you wanted to catch up with her.

9:30-9:50CTâ€"Did you talk to Bill about **Deliberative Process / Ex. 5** If not set up a time for you to call him at **Ex. 6**

10:15-10:35CTâ€"Call Senator Lankford at **Ex. 6** He originally wanted to discuss **Deliberative Process / Ex. 5**

Scott Pruitt:

Have already **Deliberative Process / Ex. 5** so we are good there. He will discuss with you. Unsure about the Susan call so perhaps more info shared with you to confirm what the subject matter is and whether it is still pending.

Tried Henry. No answer. Pls go ahead and connect with him and discuss the range of issues and get him engaged right away. Thank you.

Hayley Ford:

Patrick said you were interested in hearing from her how the meetings went in Colorado Springs. Sound familiar?

Scott Pruitt:

Yes.

Will connect with Henry.

Hayley Ford:

Lankford call moved to 9:45CT-10ish. Same number above.

Hopefully youâ€™ve connected with Susan.

Scott Pruitt:

Talked to Susan.

Hayley Ford:

Great. I just spoke with Kelly for some time regarding our discussion this morning. I donâ€™t think **Deliberative Process / Ex. 5** We figured out a process for some of the issues and happy to share when you have a few minutes
Can you call Lankford?

7/5/18, Matt Leopold to Scott Pruitt regarding 404c memo:

Attorney Client / Ex. 5

6/27/18, Tate Bennett to Scott Pruitt regarding RFS:

Deliberative Process / Ex. 5

Scott Pruitt:

Thank you for the update. Keep advancing. Appreciate your efforts and leadership as always!

Tate:

You bet!

6/26/18, Scott Pruitt to Tate Bennett re: RFS

Pls send to me the current and proposed increases for each of the categories. Thank you.

Tate Bennett:

See chart

6/25/18, Kelly Kunding to Scott Pruitt regarding travel:

Sir - To follow up on our conversation this afternoon,

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

Please let me know how you would like us to proceed.

6/24/18, Scott Pruitt to Kelly Kunding regarding travel:

Kelly " re schedule this week, what day do I need to CA? And what day do we finish? What area of the state will we be in on Friday?

Kelly Kunding:

Good morning - we are scheduled to fly into Santa Barbara on Wednesday afternoon. You are then scheduled to fly from Santa Barbara to San Francisco on Thursday afternoon. We have arranged a regional office visit and a round table in San Francisco on Friday morning and have booked you on a 1:00pm direct flight SFO to **Ex. 6/7F**

Scott Pruitt:

Miss Kelly " If you have the confirmation number for tomorrow, I can check in if that helps.

Kelly Kunding:

Sir - I went ahead and checked you in. The flight from **Ex. 6/7F** to ORD is completely full, therefore, they have booked you in a middle seat. I have asked PSD to work with the airline at the airport tomorrow morning to move your seat assignment.

Furthermore, I selected your seats for the remaining AA flights for this trip. You will be in the bulkhead from ORD to OKC and toward the front of the plane for the remaining AA flights.

You should be all set to log in to the American app and download your boarding passes.

SP:

Thank you.

6/26/18, Scott Pruitt to Marc Short regarding RFS:

Marc â€"- may we visit about the discussion we had this morning?

I asked Bill Wehrum to forward to your office the increased numbers just so you have them.

6/25/18, Ken Wagner to Scott Pruitt:

Scott: please look for Mayor Richard Bailey from Coronado at tomorrow's meeting. As he's a strong supporter and we have worked closely on The Tijuana River Spill. He's only attending the reception...please have Lincoln introduce him to any other EPA folks

Also, I am friends with a guy from the Mexican delegation. His name is Luis Carlos Romo who is the CEDES Director in Sonora (State Environmental Director). I'm going to Sonora in October to see him with Arizona for a meeting ...he is an AWESOME guy! Please meet him and say hello for me

Sorry I'm missing, but in Michigan this week

Principles

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

3/29/18, Scott Pruitt notes from work phone regarding lease

The facts are:

A written lease was executed.

With a lessor who did no business before the agency.

And consideration

Dear Scott,

I hope this note finds you well. I am writing to thank you for your invaluable contributions to the 2017 Concordia Annual Summit. By sharing your insight and experience with our community, you helped to make this year's Summit our most impactful meeting to date. We are proud to recognize that the Summit was the largest, most bipartisan, and most inclusive convening platform in New York City during the 72nd United Nations General Assembly.

During the two-day event, we brought together over 2,600 participants from across the public, private, and nonprofit sectors. Beyond our in-person audience, we had roughly 30,000 Instagram impressions, over 343,000 Twitter impressions, over 117,000 views across our live stream coverage, and we reached over 330,000 people through our presence on Facebook. Our media presence at the 2017 Concordia Annual Summit surpassed our greatest expectations and we were able to reach a broad global audience digitally.

Each year, with continued support from accomplished leaders such as yourself, we are significantly closer to providing tangible solutions for the world's most complex challenges. We hope you will continue to engage with Concordia as we strive to promote and facilitate new partnerships for social impact.

Warm regards,

Matthew Swift

Dear Scott,

I hope all is well and thank you again for meeting with me for dinner.

I do lunch last week, I suggested to Lisa Nelson that you be a speaker at ALEC's forthcoming December meeting, but Lisa beat me to the punch so to speak. I am so glad that you will be speaking at the ALEC Meeting and maybe if there is a minute you might stop by our Civil Justice Task Force. I think would be interesting if you and I could have an open discussion about the reverse impact on tort law caused by deregulation, namely "regulation through litigation" where courts feel that if the official agencies do not act, they should by changing the tort law.. Guards must be up to stop that practice

I am writing because when we met , I mentioned [Ex. 6]

Ex. 6

[Ex. 6] background is attached).

I think you would enjoy meeting [Ex. 6] and if you did you might have thoughts about where [Ex. 6] talents could be used best in this Administration.

With care and an appreciation for your time and thought, your friend Victor

Administrator Pruitt,

Congratulations on your appointment. During the last several years, I have often identified the EPA under the Obama administration as one of the biggest obstacles to job growth. I know you and President Trump are determined to change the agency's direction, and have already started to do so.

I am writing to attach a letter from Rolfe McCollister, my good friend, longtime Louisiana leader, and member of LSU's Board of Supervisors, inviting you to come speak to a group of business leaders. I know many of our businesses, particularly in the energy and petrochemical industries, have been negatively impacted by previous EPA policies, and are eager for new leadership.

I am copying both Rolfe and Tate Bennett on this email, so that they can work together to see if your schedule will allow you to accept this invitation and to arrange logistics.

Best wishes, and thanks for your efforts on our behalf! I hope you will be able to accept this invitation.

Best,
Bobby Jindal

Mr. Scott Pruitt
Office of the Administrator
Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Suite 1101A
Washington, DC 20460

Dear Administrator Pruitt,

Congratulations on your appointment by President Donald Trump to head the EPA. Let me extend my best wishes for your success.

I am the founder and publisher of the Baton Rouge Business Report for the past 35 years. Industry is a very important part of our economy in Louisiana - and growth is strong and active here in Baton Rouge and Lake Charles. As we look to the future, I would like to extend an invitation to you to visit our Capital City and speak to the industry and business leaders. I know there would be great interest.

We would be honored to work with you and Tate Bennett to find a convenient date this fall for such a forum. In the past we have hosted speakers such as Gov. Bobby Jindal, Gov. Jeb Bush, U.S. Senator John McCain and Steve Forbes. We would love to host you as well to inform our business and industrial community.

If there is a time this fall when you will be in the south or on the Gulf coast, we will work around your schedule. We would be happy to aim for a Friday if you like when LSU is playing at home and you could bring your family to stay the weekend and see the

Tigers play. Whatever the date would be, you know you will eat well in Louisiana.

I want to thank you for your consideration and hope to host you in Baton Rouge.

Sincerely,

Rolfe McCollister

Scott, I left DC last Wednesday for San Antonio and am now in Santa Barbara through tomorrow. It's always great for me when we can get together, but I wanted to take just a minute to thank you so much for taking time to meet with our group from Arizona last week while in DC. Everyone really appreciated being able to share their thoughts and have a discussion with you.

Let me know if you are coming to Montana anytime this summer. I could host an event for some of our congressional folks and your presence would be a great draw.

Thanks, again,

Mike

By the way – I'll be looking to you for advice on who to support in the OK gubernatorial race.

Administrator Pruitt,

I founded a group focused on promoting technology in agriculture (www.royseagtech.com). Attached are two papers that I will be discussing with Congressmen this week in Washington.

I believe that tech can go a long way in protecting the environment and resolving conflicts with the agriculture industry. As you may recall, I am from North Dakota so I am interested in preserving the family farm while reducing environmental impact without having to resort to over-regulation.

If you or your staff have a few minutes this week, I would love to share my thoughts.

Thanks

Subject: Re: Great to meet you

Good to hear. I will be back in your area the week of the 19th of Sept, I believe, so any in person follow up is a possibility then. Also I will be in town for various meetings on the political front and would love to have a member of my political team brief you and provide some more info about our meetings if that works for you.

21st Century Agriculture Technology & Funding Rural Broadband Infrastructure

By Roger Royse, and Allison Kroeker

Introduction

Broadband-enabled enterprises include health care, education, job training, public safety, and technology. Broadband is the key to adoption of 21st Century Agriculture Technology (“Ag Tech”). Due to the accelerating development of Ag Tech, it is the new rural driver for broadband utilization. Large telecommunications companies naturally invest in profitable urban infrastructure, however, and are not interested in cabling sparsely populated rural areas. Although 96% of California’s population is urban, 95% of the state’s geography is rural. We cannot leave out 95% of the state from broadband coverage.

Rural Broadband Infrastructure

In the Ag Tech context, broadband refers to any high-speed internet access that is always on and faster than traditional dial-up access. Broadband mapping describes geographically how internet access service from telephone and cable TV companies is available in terms of speed and price. Broadband maps are used to find “unserved” areas and “underserved” areas. The former areas contain no broadband infrastructure while the latter areas have access to broadband but not at fast speeds. Generally, rural internet users have fewer options and slower service. We need federal assistance to bring high-speed internet service to these rural areas.

Just as 19th century railroads and 20th century interstate highways played leading roles in American prosperity, high-speed internet is the factor that determines which rural communities, and which farms, will enjoy economic growth and prosperity in the 21st century. And just as it took public investment to bring transportation infrastructure to rural regions of the U.S., it will take public resource investment to bring high-speed internet to rural communities and farms. Funding rural broadband infrastructure is the single most promising public resource investment the federal government can make to provide unserved and underserved regions of the country with economic prosperity, opportunity, and technological innovation.

Agriculture Technology

Ag Tech represents the future of farming. It is broadband-enabled technology that increases the efficiency of farms. Ag Tech generally consists of marketplaces, farm management software, precision agriculture, sensors, smart irrigation, and drones and robotics.

- Marketplaces are e-commerce platforms that connect farmers directly to vendors and consumers.
- Farm management software allows farmers to efficiently manage their resources, such as crop production and farm animals.

- Precision agriculture focuses on predictive analytics to address allocation issues and make better decisions regarding energy, water, and pesticide efficiency.
- Sensors are smart devices that collect data and help farmers evaluate crop health, weather, and soil quality.
- Smart irrigation provides systems that help monitor and automate water usage for farms.
- Drone companies can also cater to agricultural needs, while robotics can provide intelligent farm machines that perform various farm functions.

Today, Ag Tech most commonly consists of the sensors that monitor, analyze, and respond to changing farm conditions. Other major areas of applied Ag Tech include maximizing yields, maximizing water efficiency, increasing energy efficiency, sustaining the environment, and ensuring food safety. The two latter applications are driven by state and federal regulations wherein Ag Tech offers a means of meeting the various statutory requirements. In fact, many of the sensors and other Ag Tech instruments have multiple benefits. For example, water irrigation technology saves money, water, power, and meets state groundwater regulations. Sensors monitoring chemical inputs also optimize farm efficiency while minimizing the farmer's footprint on the environment.

The adoption and application of this type of Ag Tech rests on the availability of the internet. In order to access the internet, Ag Tech requires rural broadband infrastructure. Broadband enables smart devices to compile, analyze, and transmit data to farmers that increases productivity, quality, and sustainability. In addition, Ag Tech is scalable to smaller farms and even facilitates alternative farming methods to permit farming in locations and settings that cannot support traditional farming. Reaping all of these benefits requires a massive rural infrastructure that can only be obtained through federal assistance and funding to ensure that broadband is not only accessible, but useful to farmers and conducive to technological innovation within rural communities.

Realizing Funding

One way to implement rural broadband infrastructure is through FirstNet. FirstNet is the largest amount of federal funding available for broadband infrastructure. Its purpose is to create a national system of emergency communications between all first responders. We propose that Congress ensure that FirstNet emergency communications are provided to rural regions of California and not limited to making urban population centers a priority like most broadband infrastructure initiatives.

Clearly, this would only assist Ag Tech if there is also a multiple use requirement for any FirstNet investment. In other words, a FirstNet broadband system needs to not only be available for rural regional use, but FirstNet resources would also have to be bundled with other broadband resources (regardless of source) to create a multi-benefit system. The implementation of rural broadband infrastructure under this model operates under the assumption that there are simply not enough public resources to build redundant single-use broadband systems.

Alternatively, or contemporaneously, the federal government may implement a program that assists and encourages state and local governments to invest in rural broadband infrastructure. Congress can realize such a program by offering states like California a match of federal resources. This way, from both federal and state perspectives, the public resources that are invested will be leveraged. Notably, any leveraged public resources under this program would need to be invested in the form of grants in order to actually benefit the unserved and underserved areas of California. Successful funding models include the Internet For All Now Act and the New York state broadband infrastructure.

The reason current federal programs offered by the U.S. Department of Agriculture (“USDA”) do not work is because they provide loans and not grants. These loans typically take two years to acquire after initiating the application process. Instead of bringing 21st century Ag Tech to the farm fields, the current programs offer assistance only to those communities that can wait two years before confirming that a broadband-enabled investment opportunity is available and have the means to pay back any federal funds that are ultimately received. This is stifling the economic growth and prosperity otherwise available to rural communities. Thus, the facilitation of Ag Tech innovation through federal programs is in need of comprehensive reform.

Realizing Innovation and Prosperity

To facilitate innovation, any comprehensive reform should also consider adopting a program for funding proof-of-concept projects. Ag Tech is a hot bed of innovation and improvement where internet access acts as an entry point to the 21st century economy. From optimizing agriculture, to protecting the environment, and ultimately ensuring our own health and safety, we need to be investing in our future by funding proof-of-concept projects to support the creation of new Ag Tech and improvements to broadband infrastructure. The benefits of such funding extend to rural medicine, distance learning, transportation, public safety, direct market access, and even rural tourism and recreational activities.

We should also encourage federal funding and regular surveys of broadband signal available on farm fields to create a metric for the constraints imposed on Ag Tech by broadband service technology. While some Ag Tech does not require high bandwidth, this is due to Ag Tech attempting to adapt to the lack of high-speed internet in rural areas. It does NOT mean that Ag Tech does not need high-speed internet to be available on the farm fields. We need to have high bandwidth availability for farm fields and rural communities in order to fully realize the benefits of having rural broadband infrastructure.

Conclusion

AgTech continues to grow at an accelerating rate towards a \$240 billion industry by 2050. It will enable farm production to meet the future doubling of global food demand. If we have rural broadband, the same internet platform used for farming in the fields can be used to increase the overall prosperity and quality of life in the U.S. and particularly in our nation’s rural communities.

Specialty Agriculture and the Reallocation of Farm Bill Funding

By Roger Royse and Allison Krueker

Introduction

Specialty crop producers, researchers, and farmworkers provide our nation with safe and nutritious food. That is an enormous responsibility and requires federal support. Federal support for specialty agriculture research and development not only increases economic prosperity on the farm fields but in every family's home. Federal funding provides all Americans with economic opportunities, technological innovation, and educational experiences, in addition to putting food on the table. Specialty agriculture must therefore be a permanent priority in the federal budget.

Specialty crops generally consist of plants used by people for food, medicinal purposes, and aesthetic gratification. They are defined by the USDA as "fruits and vegetables, tree nuts, dried fruits, and horticulture and nursery crops (including floriculture)." The diversity of specialty crops and their variety of uses make the task of developing policy in this area particularly challenging. Federal funds can be used to support projects ranging from food safety compliance to distribution systems and marketing.

Federal funds can also provide scientific advances that enable our country to use the most efficient and environmentally sound agriculture technology in the world. Funding this research is imperative due to the industry's increasing reliance on science and technology to maintain profitable production. Likewise, labor dependency is an ongoing concern regarding specialty agriculture's profitability in the absence of labor saving technology. Thus, we propose that disproportionate funding for conventional agriculture be reallocated to specialty agriculture in the next farm bill so the specialty crop programs can continue to act as efficient safety nets and effective innovation initiatives.

Specialty Crop Provisions

Every five years or so, Congress passes a "farm bill" specific to American agriculture. The Agricultural Act of 2014, also known as the 2014 farm bill, put permanent programs in place to address the critical needs of the specialty crop industry and enhance the competitiveness of specialty crops. Realizing this goal requires the continuous reform of outdated agriculture policies that do not adequately address the realities of specialty agriculture, modern economies, or their labor challenges. Each year, we rely on our representatives to allocate federal resources to meet the needs of specialty crop producers and specialty agriculture technology on a budget that is realistic and fair to taxpayers.

Unfortunately, federal support for specialty crops still differs in significant ways from commodity crops. Since the 1930s, farm bills have focused on farm commodity program support for the staple, non-perishable, and generally storable commodities such as corn, soybeans, wheat, cotton, rice, and sugar.

Federal support for specialty crops is relatively recent and its funding is disproportionately small. Accordingly, policy still weighs commodity crops as being essential or more important than specialty crops. Although the 2014 farm bill provided permanent funding for specialty crops, the programs still account for a small share of total farm bill spending, well below spending levels for commodity crops.

Mandatory funding for the major commodity crops averages about \$4.7 billion per year, compared to \$773 million for specialty crops.¹ In addition, specialty crop producers do not benefit from the same types of federal commodity price and income support programs that benefit commodity crop producers. Specifically, the specialty crop programs do not provide benefits for individual produce growers directly, but rather for the specialty crop industry as a whole. While the provision of direct benefits and an increase in mandatory funding would give specialty crops equal footing with commodity crops, we instead propose a more efficient allocation of resources as part of next year's policy reform.

Specialty Crop Block Grant Program

The Specialty Crop Block Grant Program provides federal funding to "enhance the competitiveness of specialty crops." The 2014 farm bill provides \$72.5 million for this program in 2017 and \$85 million in all subsequent years. Examples of projects that enhance competitiveness include efforts to enhance food safety, sustainability, developing new and improved seed varieties, pest and disease control, increasing nutritional knowledge and consumption of specialty crops, reducing the costs of distribution systems, and helping businesses to comply with the requirements of the Food Safety Modernization Act.

Application forms are submitted to each state's department of agriculture which helps manage the competitive grant process. Each state consolidates the applications it receives from interested parties into a single plan to indicate how grant funds will be used. States are eligible to receive an amount that represents the proportion of the value of specialty crop production in the state in relation to the national value of specialty crop production. Specialty crop production is focused in California, Florida, Washington, Oregon, North Dakota, and Michigan.

A majority of specialty crop producers are considered specialized, which means that they receive at least half of their gross value of production from the sale of fruits and vegetables, tree nuts, or other specialty crops. Specialized farms account for 90-95% of the total value of U.S. specialty crop production and are concentrated in the Western states. These states do not have nearly as much representation as Midwestern states where commodity support programs receive substantial support. Specialty crops make up one-fourth of the value of U.S. crop production and receive less than one-fifth of the funding provided to commodity crops.² We ask that farm bill funding be increased for specialty crops through a proportionate reallocation from commodity programs based on the U.S. crop production statistics. This allocation is a fair and necessary adjustment to 21st century agriculture policy based on the modern economy as well as the demands of farm innovation and a shrinking labor force.

¹ See CRS Report IF00014, The 2014 Farm Bill (Agricultural Act of 2014, P.L. 113-79).

² See CRS from USDA, 2012 Census of Agriculture (Table 2, Market Value of Agricultural Products Sold), https://www.agcensus.usda.gov/Publications/2012/Full_Report/Volume_1,_Chapter_1_US/st99_1_002_002.pdf.

Specialty Crop Research Initiative Program

The Specialty Crop Research Initiative Program addresses the critical needs of specialty agriculture by awarding grants to support an organization's research proposal. The 2014 farm bill set aside mandatory funding of \$80 million each year for this program. Of that amount, \$25 million is set aside for citrus disease research. The remaining funds support projects that address at least one of five legislated focus areas: (1) genetics; (2) pests and diseases; (3) efficiency and profitability; (4) innovation and mechanization; or (5) food safety.

Generally, these research grants are awarded to universities for standard research and extension projects to support problem-solving efforts. The next farm bill creates an excellent opportunity to make it easier for individuals and small businesses to apply for these grants, or even extend these funding opportunities to startups. Relaxing the program's eligibility requirements would not only facilitate technological innovation in the private sector but support American entrepreneurship and small business.

At the same time, it is imperative that federal policy promote co-innovation. A proactive approach to realizing innovation requires a networking platform to accelerate the exchange of ideas and information across industries. The three main industries involved in the development of agriculture technology are the academic research institutions, the technology startup industry, and the finance industry. Fostering co-innovation among industries provides a platform for entrepreneurs to learn about licensing intellectual property from the universities. Funding UC extensions cannot create new ventures without this bridge to entrepreneurship. Thus, we propose an expansion of the research initiative program's focus areas to consider additional projects for startup funding and co-innovation platforms.

Resolving Labor Challenges

Specialty agriculture has a completely different cost structure, and a completely different set of policy interests, than conventional agriculture. The latter's cost structure is based on land while the cost of specialty crops is based on labor. Nearly all specialty crops destined for the fresh market are hand harvested to ensure freshness and a pleasing appearance. Hand-harvesting accounts for 50% of specialty agriculture production costs, and continues to rise as the labor force shrinks. With the decline of labor availability and increasing labor costs, specialty crops are losing their price competitiveness in the world markets.

In the absence of labor saving technology, American specialty crop producers have no safety net. Domestic workers will not accept seasonal agricultural jobs in sufficient numbers and the H-2A visa program is currently too complex and costly to maintain profitability. Federal support is required to compete with cheap imports and modern labor challenges. Federal investment in agriculture technology is the single most promising use of farm bill funds to stabilize prices, reduce manual labor, and create permanent jobs with higher income for domestic workers. Thus, adequate funding for the research and development of agriculture technology is required to protect U.S. crop production and keep specialty crop producers in business.

Conclusion

Congress has made historic investments to support U.S. crop production and keep U.S. growers in business while ending unnecessary subsidies and programs. We can continue to support our nation's farmers and families by reforming federal agriculture policy in the next farm bill. The reallocation of commodity funds to meet the critical needs of specialty crop producers is a fair and necessary compromise to invest in our future and economic prosperity.

Dear Scott,

A friend of mine named [Ex. 6]
[Ex. 6] I have mentioned [Ex. 6] name to you, but it was in the middle of your confirmation hearing and all the hullabaloo.

Is there a chance [Ex. 6] could meet with you during [Ex. 6] time in DC for 20 minutes? He understands time constraints.

If so, who should [Ex. 6] contact? If this does not work out during the March 21-24 time period, could [Ex. 6] work with your office in scheduling a time in the near future please?

Just let me know. I wont over ask, but everyone from the Michigan Farm Bureau to the Michigan Oil and Gas Association sure have you at the top of their respective agendas.

Thank you for your consideration.

All the Best,

Bill

Scott, this resume was forwarded to the Presidential Transition Team. I am sure they get a lot of referrals, but I wanted to make sure you got to see it. The Arizona Chamber of Commerce president, who worked for US Senator Jon Kyl for 20 years, highly recommends this attorney to be considered somewhere within the EPA. Let me know your thoughts.

Subject: Your talk to staff was perfect

Dear Scott,

I am sorry you had to cancel our dinner, but I realize you are just overwhelmed with important issues at this juncture.

I want to let you know that I thought your remarks to EPA staff were perfect. They reflected the thoughts that I wrote you about last week. The more you establish yourself with the EPA bureaucracy as a warm, thoughtful human being who believes in the EPA, but simply wants to follow the law and its actual mission, the more outside hate groups will fade away. At least in my experience, people put what we know in person over what we might be told to them by outside parties.

I thought of simple way to explain one of your basic points. Some might want the EPA to print special dollar bills with the words "Help Prevent Air Pollution" on them. Such an effort might be an effective way to spread that message. But the EPA is not authorized by statute to print dollar bills; it can only accomplish its mission through ways in which it has been authorized by statute passed by Congress ☺

I hope we can have our dinner or meeting soon. Again, I realize your schedule is jammed.

Here are some additional quick thoughts that you may have already processed.

- <!--[if !supportLists]--><!--[endif]-->Go to meet SES bureaucrats in their office. Listen, exchange thoughts, and just be yourself. You are a very engaging human being, let them see that. Talk a little bit about baseball when you think appropriate.
- <!--[if !supportLists]--><!--[endif]-->If possible, do not have a picture of the President in your office.
- <!--[if !supportLists]--><!--[endif]-->If possible find another alternative office that is closer to the bureaucracy other than the office of the Administrator, in many agencies the head person is on a separate floor in an isolated area. This is not good for building bridges with those who work at the Agency
- <!--[if !supportLists]--><!--[endif]-->If you have meetings at the White House or in other important places, if possible always take a senior bureaucrat with you. They may not seem like they like it, but they do.

I would be pleased to meet in your office or wherever for whatever time. Your situation so reflects what I faced many years ago that I feel it a privilege to be at least a little help.

Lastly, I noticed that you shared with Kim Strassel that you would stop the EPA practice of "sue and settle." You and I have discussed this. Perhaps we should support legislation to block that practice anyway (it will be easier to pass now) to prevent it from ever coming back again. Your thoughts?

Your friends at all times, Victor

Scott -

A solid congratulations on your appointment and confirmation as EPA Administrator. I appreciate your continued commitment to serve. One of the things I do when I'm not running around the AG circuit is help run Ag America, the national caucus of GOP ag leaders. Think of it as RAGA for agriculture. We support elected and appointed commissioners, directors, and secretaries of agriculture, state legislative ag leaders, and other state and federal candidates and officeholders with proven records of supporting agriculture. That's the quick version.

Here's the reason for the email. Ag America is hosting its 2017 DC Conference April 5 at the JW Marriott. The event will be comprised of a lunch, followed by a couple of hours of policy sessions, and wrapped up with a reception and dinner (I've attached a draft agenda). Attendees will include the various private sector ag stakeholders in DC and a number of elected state ag leaders - at this early stage: Commissioner Ryan Quarles (R-KY), Secretary Bill Northey (R-IA), and Director Jamie Clover Adams (R-MI) are all confirmed to attend. We have yet to hear from a handful of state legislators and 1-2 folks from the Hill.

These are folks who intimately understand the impact of the EPA, and would no doubt appreciate hearing from you. We'd be happy to have you give remarks during the opening lunch, or drop in at any time that works better on for your schedule.

So that's it. Direct me to whoever is the appropriate next step in this process and hopefully we're able to make it work.

Thanks for your service from the beginning. I really appreciate how you've handled your time in office. I have no doubt you'll carry that forward at EPA and once folks see that, they'll simmer down.

Talk soon.

Yep. All set. Jim is good.

Any thoughts about traveling to Oklahoma next week? There's an opportunity to wedge a trip in which may help with family opportunities and tying loose ends without missing anything.

I've placed calls in with Mulvaney and Tillerson's chiefs this weekend to set up phone calls between you when convenient. Having good relationships with OMB is good. State goes without saying. And when Perry and Zinke get confirmed, I'll set up calls with them too.

Thanks for choosing Southwest® for your trip. You'll find everything you need to know about your reservation below. Happy travels!

Upcoming Trip: 02/20/17 - Washington D.C.

Air Itinerary

AIR Confirmation: 50XFZ3

Confirmation Date: 02/19/2017

Passenger(s)	Rapid Rewards #	Ticket #	Expiration	Est. Points Earned
PRUITT/EDWARD S COTT	Ex. 6	5262488834351	Feb 19, 2018	0

Rapid Rewards points earned are only estimates. Visit your (MySouthwest, Southwest.com or Rapid Rewards) account for the most accurate totals - including A-List & A-List Preferred bonus points.

Date	Flight	Departure/Arrival
Mon Feb 20	389	Depart TULSA, OK (TUL) on Southwest Airlines at 5:45 PM Arrive in ST. LOUIS, MO (STL) at 6:55 PM <u>Companion Pass</u>
	619	Change planes to Southwest Airlines in ST. LOUIS, MO (STL) at 7:55 PM Arrive in WASHINGTON (REAGAN NATIONAL), DC (DCA) at 10:45 PM Travel Time 4 hrs 0 mins <u>Companion Pass</u>

Check in for your flight(s): 24 hours before your trip on [Southwest.com](https://www.southwest.com) or your mobile device to secure your boarding position. You'll be assigned a boarding position based on your check-in time. The earlier you check in within 24 hours of your flight, the earlier you get to board.

Bags fly free®: First and second checked bags. [Weight and size limits apply](#). One small bag and one personal item are permitted as [carryon items](#), free of charge.

30 minutes before departure: We encourage you to arrive in the gate area no later than 30 minutes prior to your flight's scheduled departure as we may begin boarding as early as 30 minutes before your flight.

10 minutes before departure: You must obtain your boarding pass(es) and be in the gate area for boarding at least 10 minutes prior to your flight's scheduled departure time. If not, Southwest may cancel your reserved space and you will not be eligible for denied boarding compensation.

If you do not plan to travel on your flight: In accordance with Southwest's No Show Policy, you must notify Southwest at least 10 minutes prior to your flight's scheduled departure if you do not plan to travel on the flight. If not, Southwest will cancel your reservation and all funds will be forfeited.

Air Cost: 5.60

Fare Rule(s): [5262488834351](#): 1234.

Valid only on Southwest Airlines. All travel involving funds from this Confirmation Number must be completed by the expiration date. Unused travel funds may only be applied toward the purchase of future travel for the individual named on the ticket. Any changes to this itinerary may result in a fare increase.

Dear Scott ,
First congratulations on your Senate confirmation as Administrator of the EPA.
Scott this is important . You will face the same thing I faced while serving a President , significant hostility from the bureaucracy . I was ready to quit after two months at the Department of Commerce . But a senior beaurcrat ,Louis Santone saw some hope in me. He taught me things that are in no book. I ended up staying and being awarded the Secretary of Commerce's medal. It was really owed to Mr.Santone, which I said at the awards Ceremony .
I would like to assist you.I am out of the County right now , but can receive e mail. back in the office Tuesday . [Ex. 6]

Ex. 6

Hope you will take up this offer ☺, your friend ,
Victor
